Removable Hard Disk Drive Solution

Protecting Your Confidential Information

Canon imageRUNNER® and imagePRESS™ devices include a standard internal hard disk drive that provides the sophisticated document workflow and productivity capabilities that power businesses. For many environments, the advanced data security features of the imageRUNNER and imagePRESS system architectures are more than sufficient to protect the confidentiality of information that's scanned, printed, or stored on the device's disk drive.

However, to meet even stricter corporate guidelines or government regulations, some organizations have chosen to protect their data by completely removing the internal hard disk when the device is unattended or not in use. To address this need and facilitate quick and easy removal, Canon has responded with the optional Removable Hard Disk Drive Kit for select imageRUNNER and imagePRESS models.

Simplicity in Design with Security in Mind

The Removable Hard Disk Drive solution utilizes a device-mounted casing and a keyed locking mechanism to secure the disk to the device. Only when the Removable Hard Disk Drive is securely seated and locked will the device operate and the stored data be accessible. When the device is not in use, administrators can unlock the drive enclosure from the mounted casing and store it in a safe location until the device is needed again.

CONFIDENT DEFENSE AGAINST COMPROMISE

When it comes to achieving the level of data security your organization needs, Canon's system architecture protects your information, even when the Removable Hard Disk Drive is disconnected from the device. The data stored on the removable disk is extremely difficult to recover in a usable form. This is due to the data being compressed in a proprietary format and stored in random, non-contiguous locations throughout the drive. Furthermore, the data is only usable in its original device and cannot be accessed if installed within another device.

For an even greater level of security, Canon also offers a number of strong security features which further protect against unauthorized access or malicious use. Contact your Authorized Canon Dealer for more information or visit **http://www.usa.canon.com**.

Removable HDD Enclosure

SUPPORTED DEVICES

The optional Removable Hard Disk Drive Kit has been designed to work with the following Canon devices:

- imageRUNNER 3045/3035/3030/3025
- imageRUNNER 4570/3570/2870/2270
- imageRUNNER 4570G/3570G/2870G/2270G
- imageRUNNER 3530/2830/2230
- imageRUNNER 3530G/2230G
- imagePRESS C7000VP/C6000VP/C6000

Support for additional models is planned and will be announced at a later time.

Note: The Removable Hard Disk Drive Kit does not work with the HDD Data Encryption Kits.
